

Ultherapy®

SEE THE BEAUTY OF SOUND™

Dare to Bare  
your décolletage!

With an Ultherapy® Ultrasound Treatment

## The Décolletage.

So reliable, so unassuming and yet so easily forgotten.

Every bit the wallflower, the décolletage waits patiently to be noticed, while the neck and face—just inches away—are fussed over, tended to and doted upon.

Oh, what the décolletage  
wouldn't give for that kind of  
love and attention!

## The Impact.

Years of sun exposure, side-sleeping, push-up bras and the passage of time have taken a toll on the once-beautiful chest.

The décolletage, now marked by fine lines and wrinkles, is often hidden under high necklines, oversized scarves and thick jewelry.

She longs to be rescued—  
but how?

## The Solution.

The safe, non-invasive power  
of the Ultherapy® treatment!

FDA-cleared to improve lines  
and wrinkles on the décolletage.

- No downtime
- Single treatment
- Builds new collagen

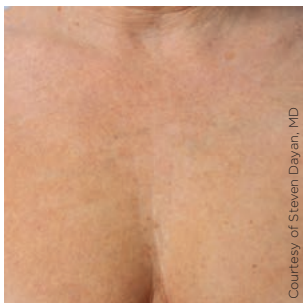

At last!

To learn more about the Ultherapy<sup>®</sup> décolletage treatment, visit [Ultherapy.com/DareToBare](http://Ultherapy.com/DareToBare).

You may experience some redness for a few hours following the procedure. It is not uncommon to experience slight swelling for a few days, or tingling/tenderness to the touch for a few weeks after the procedure, but these are mild and temporary in nature. There is the possibility for other less common post-procedural effects, such as temporary small areas of bruising or numbness, which your physician will review with you.

The Ulthera<sup>®</sup> System is indicated for use as a non-invasive dermatological aesthetic treatment to lift the eyebrow, lift lax submental (beneath the chin) and neck tissue, and to improve lines and wrinkles of the décolletage.
